Todd-- I have your message of Feb 11, 1104 , and have circulated it among relevant counselors here to able able to respond with message tomorrow.

I think you would be well advised to include provision for another disk spindle here -- if the committee is in a cutting mood they will single that out anyhow, and leave you at least no worse than before. Careful phrasing; that without extra file space, you and others will be cramped, and you may have some problems in quick turnaround; so that life will be somewhat difficult but survivable ; and I think you optimize your chances.

Of course your students have to have first priority. But if the file space doesn't exist, we all have to make do with less.

Josh
